

I have enjoyed and support the K-Love FM broadcasting for some time now. I think it has a positive influence on my life in that it is a source of encouragement and teaching in morality -something lacking in this country. I believe that if you were to replace FM with local FM areas of the country would be left with substandard or less substantial broadcasting. I believe it is in the interest of the US to maintain free speech and to change this from a regular FM to LFM would be in the step of losing some of our free speech. Thank you. Linda Mangan
